

XM Instant Traffic & Weather is a very good tool to have in your car. Broadcast stations only give the weather and traffic at certain times of the day, not whenever you need it. Please spend your time working on things that will help the people of this country, not what a bunch of high priced lobbyists are pushing on you. Please dont take away my right to listen to what I want to. This is the United States. XM Radio gives us this service because we, the listeners have asked for this. Please reject the NAB's petition 04-160. Thank you
